

# CALDRON FALLS-GOODMAN (J88) TRANSMISSION LINE PROJECT

## Overview

American Transmission Co. plans to rebuild a 21-mile, 69,000-volt transmission line in Marinette County between the Caldron Falls Hydro Substation on Boat Landing 8 Road and the Goodman Substation on 614 Woods Lake Road. The line is in an aged condition and reaching the end of its asset life. The project will involve removing the existing line and building a new line in the same corridor, but generally offset about 38 feet from the current line. The offset is necessary because the existing line cannot be taken out of service for an extended period.

Additional work will be required at Caldron Falls and Goodman substations and Fox Hills Switching Station.

The project will require approval from the Public Service Commission of Wisconsin.

Cost is estimated to be \$28.2 million.

## Major milestones

<b>Public outreach</b> .....	<b>Summer 2017</b>
<b>File regulatory application</b> .....	<b>June 2017</b>
<b>Regulatory review</b> .....	<b>Late 2017-early 2018</b>
<b>Easement negotiations</b> .....	<b>2018</b>
<b>Right-of-way clearing</b> .....	<b>January 2019</b>
<b>Foundations, structures and line construction</b> .....	<b>Summer 2019</b>
<b>In-service date</b> .....	<b>Summer 2020</b>
